AIMS & OBJECTIVES:

- **Develop theoretical knowledge and technical skills**
- **The implant patient journey and treatment stages**
- **Asepsis and setting up for surgical procedures (Practical session)**
- **Overview of implant surgery and additional procedures**
- **Implant placement using models**

Jennie is a highly experienced dental professional with over 25 years of dental nursing experience. She holds post-qualification certifications and has developed extensive expertise across a range of specialist areas, including conscious sedation, oral health education, dental implant nursing, and dental radiography for dental nurses.

Throughout her career, Jennie has demonstrated a strong commitment to patient care, clinical excellence, and professional development. Her broad clinical knowledge and leadership skills have enabled her to progress into practice management, where she successfully oversees the day-to-day operations of Aura Dental Clinic.
