Alif Moosajee is the award winning Principal Dentist of Oakdale Dental and the author of the book *'The Smiling Dentist'*.

He has been a GDP for over 20 years but his practice is now limited to Implant Dentistry.

Being at the forefront of technological advancement in dentistry, Alif has become a sought-after speaker both nationally and internationally in the disciplines of Digital and Implant Dentistry

With a mission to give back and to also help improve the standards in dentistry, Alif created his Smiling Dentist YouTube Channel and runs his study club in Leicester both with the aim to disseminate knowledge to his peers in all facets of professional and personal excellence.

Alif has a love for communication and understands that good communication leads to successful relationships with his team, his peers and his patients in the same way that poor communication is often the reason for much conflict, frustration and can even lead to complaints. This was the inspiration for him writing his book which helps to communicate dentistry in a clear and jargon free way.

Alif continues to put pen to paper, writing a number of articles, and is on to the editorial board of Clinical Dentistry and is a judge for the Dentistry Awards and the Private Dentistry Awards.
