- Be familiar with implant impression techniques, their pros and cons and materials to use
- Hands-on exercise taking impressions using different types of impression copings

Speaker:

Dr. Nikhil
Oberai

BDS MSc Dental Implants
(Special Interest in
Dental Implants)

Dr. Oberai is the principal dentist and co-owner at an award winning dental private practice in Cheshire.

Qualified from Manchester Dental School, he returned to complete his Masters Degree in Dental Implantology.

He is an Honorary Clinical Teaching fellow at the University of Manchester for 5th year dental students together with teaching postgraduate students as part of the Masters of Sc. in Dental Implantology. He lectures all over the U.K. and is leading the way in new age Implant Dentistry, with cutting edge techniques and consistent and high-quality results.

Dr. Oberai is also an external examiner for the BAIRD Implant Course and a clinical mentor for other dentists training in dental implantology at Cambridge Dental Academy.

Being a Key opinion leader for Osstem UK and lecturing in dental implants across the UK has been an inspiring role in his career. His passion and interest in dental implants, both the surgical aspects and the restorative challenges, have allowed him to achieve exceptional success rates and provide his patients a high standard of care. He takes great pride in his work and his results at his practice and has built a reputation in the local area as a skilled and successful clinician.
